

BELLY BREATHING

A simple way to calm your body and mind.

Belly breathing helps you feel calm, relaxed and in control.
Let's try it together!

1

SIT COMFORTABLY

Sit or lie down.
Put one hand on
your belly and
one hand on
your chest.

2

BREATHE IN

Breathe in slowly
through your nose.
Feel your belly
get bigger.

3

BREATHE OUT

Breathe out slowly
through your mouth.
Feel your belly
get smaller.

4

REPEAT

Take slow, deep
breaths. You can
do this as many
times as you need.

≡ **REMEMBER** ≡

Slow breaths help you feel calm.
You can use belly breathing
anytime, anywhere!

I can pause. I can breathe.
I can handle this.
