

HOW MY BODY FEELS

Different feelings show up in my body. I can listen to my body!

FEELING	WHAT I MIGHT NOTICE IN MY BODY	WHAT CAN HELP
 ANGRY	 • My fists clench. • My jaw feels tight. • My heart beats fast. • My body feels hot. • I want to yell or hit.	• Take deep breaths  • Squeeze a stress ball  • Count to 10 1 2 3 • Take a break 
 WORRIED	 • My stomach feels funny. • My heart beats fast. • My muscles feel tense. • I feel shaky or restless. • I have lots of "what if" thoughts.	• Take slow, deep breaths  • Talk to someone  • Write or draw  • Use a fidget or take a break 
 SAD	 • My chest feels heavy. • My energy is low. • I feel like crying. • I want to be alone. • My shoulders slouch.	• Talk about how I feel  • Listen to music  • Hug something soft  • Do something I enjoy 
 HAPPY	 • My face smiles. • My body feels relaxed. • I have more energy. • My heart feels light. • I feel calm and good.	• Keep doing what helps  • Share my joy  • Be kind  • Enjoy the moment 
 SCARED	 • My heart beats fast. • I feel shaky. • My stomach hurts. • My eyes get wide. • I want to run or hide.	• Ground myself (5-4-3-2-1)  • Take deep breaths  • Stay with someone I trust  • Remind myself I am safe 

My body gives me clues. I can listen, take care of myself, and ask for help.
